Dear Parents,

On Wednesday October 9th we will be conducting a Math’s Evening presented by Rob Vingerhoets. We encourage parents and children to attend this hands-on session which will feature games and activities. (Children in Years Prep/1 may find the 2 hours a bit lengthy feel free to leave earlier if needed.)

The session will be held in the hall and begin at 7pm concluding by 9pm.

Below is a brief outline of what the session will cover:

“Teaching the operations can be about as much fun and as exciting as watching paint dry so imagine what learning them may be like for your students. It just doesn’t have to be that way and this session will feature activities and games for the operations that engage students and essentially make learning and using the operations more interesting and enlightening.”

Staff have received PD and observed modelled lessons by Rob and he certainly is both entertaining and informative in his sessions.

Please indicate below if you will be attending and return to school ASAP. It promises to be a great night!

Regards
Josie Kirby
Numeracy Leader
